Fuse Box- rat protection

Magnor's Fuse Box- rat protection is a unique revolutionary system for rats and mice control, preventing the damages caused by rodents such as mice and rats.

Rodents, such as rats and mice have a wide hearing range that includes high ultrasonic frequencies. The system creates a hostile zone, forcing them to escape from it.

Magnor's Rat Control is a professional tool for preventing damages caused by rats and mice and is effective in solving rodent problems in general.

Main Features:

- Produces an ultrasonic sound beam, which is effective for a 10 meter range with a 180° sound beam.
- Three built-in speakers with high sound quality of 24 bit.
- Randomly frequency changes in range of 21-35 kHz controlled by a smart CPU.
- 14 sound patterns, changing randomly in accordance to sound reverberations and the activation mode of the unit.
- Audio output power of 30-71db.
- **100% rodent free area.**

- Active ultrasonic sound system, produce random broadcast of 36 sound patterns in a Variable intensity, controlled and monitored by a smart CPU.
- Equipped with 3 high quality sound speaker.
- Equipped with 2 indication lights in the front of the unit.
- Generates 3 way ultrasonic acoustic beam in efficient range of 10 meters.

- Equipped with din rail mount for easy installation in standard fuse box and electrical cabinets.
